

C#.NET @ Sunbeam Infotech

Trainer: Nilesh Ghule

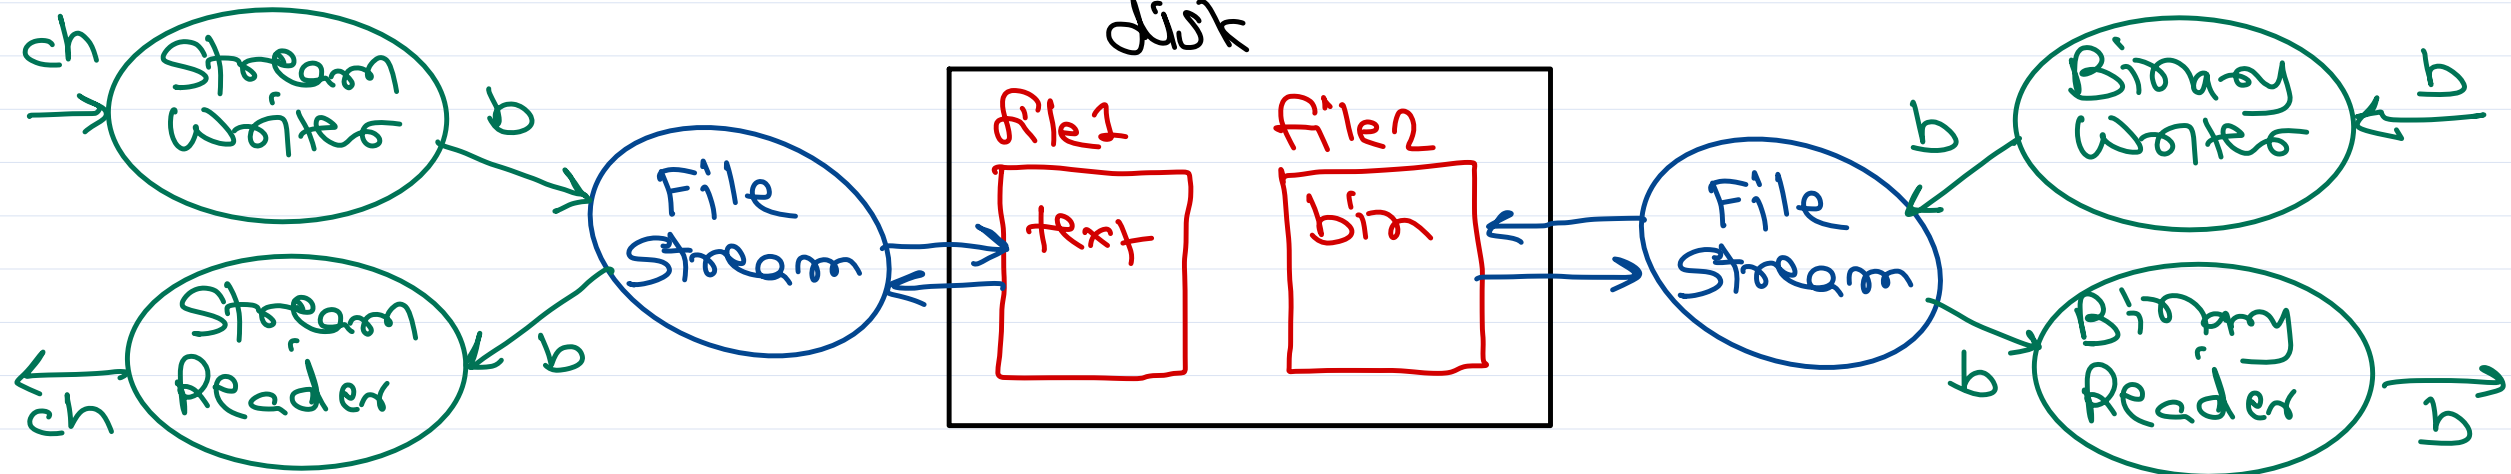

File IO

• Net IO → based on streams

Stream → flow of bytes

~~~~~ → obj in which data can be written  
or data can be read from.

↳ FileStream, NetworkStream, CryptoStream  
↓ ↑                      ↓ ↑                      ↓ ↑  
Disk File                      Socket                      encrypt/decrypt

*Thank you!*
