

vector<>	
store the data within the program	emp.txt
FileIO	1
store the data in the harddisk	2
	3
	4
	5
	6
Stream	7

India is my country.

id		
name	cin>>id>>name>>salary	
salary		
address		
	1	ss 1,Anil,10000
	/	
	Anil	
	/	
	10000	

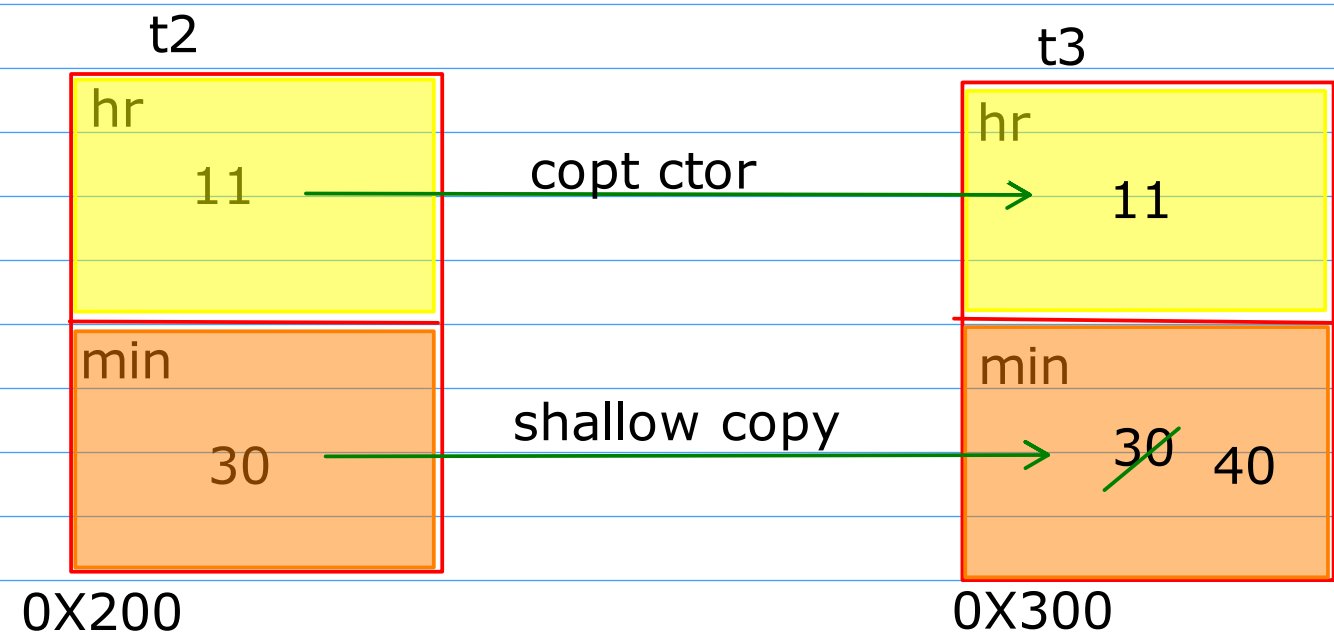

Program starts -> I will read the employee.txt
Bring all the data from the file inside employee vector

Perform the required operations in the menu
It will manipulate the vector

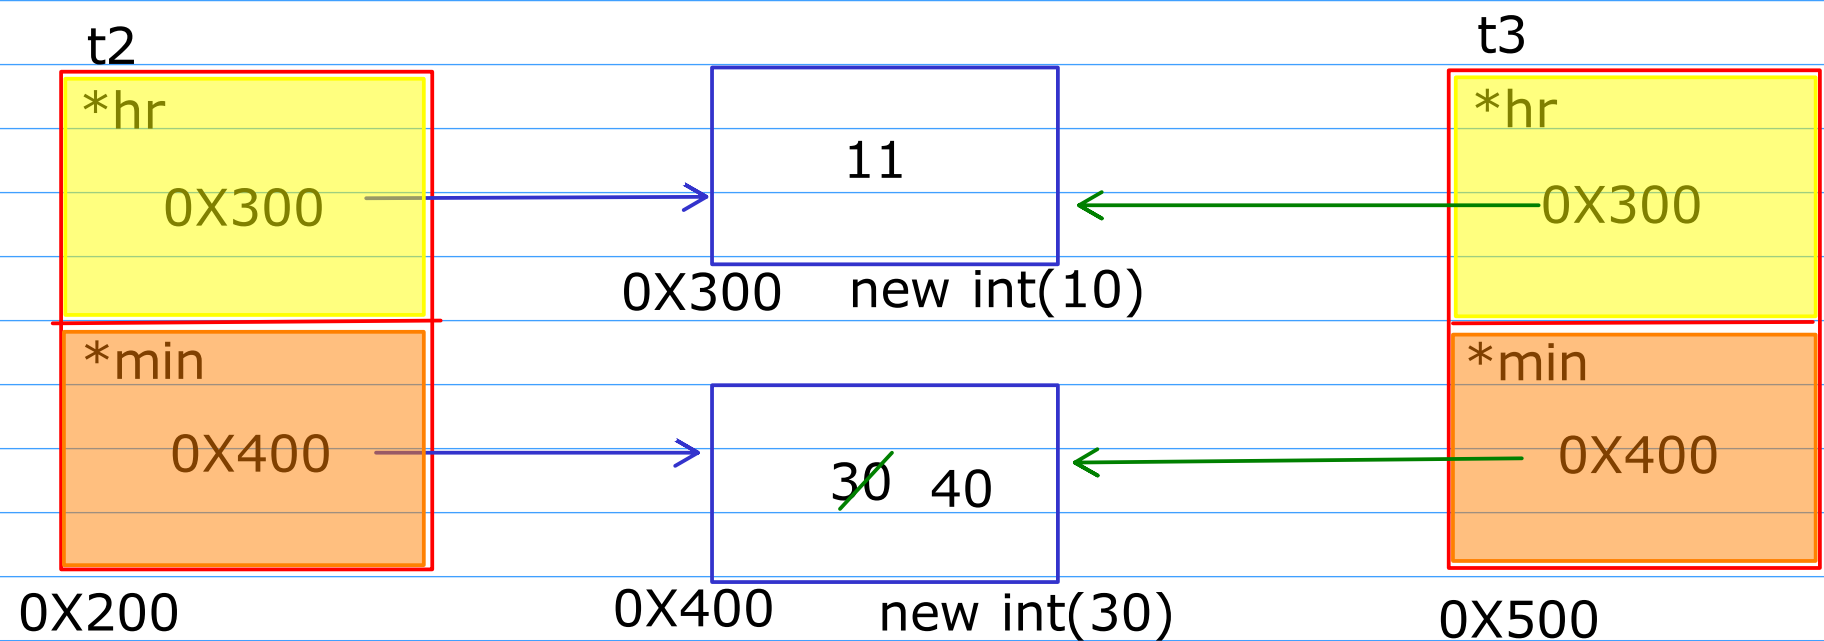

Before terminating the program overwrite the file with the present vector data

Database application

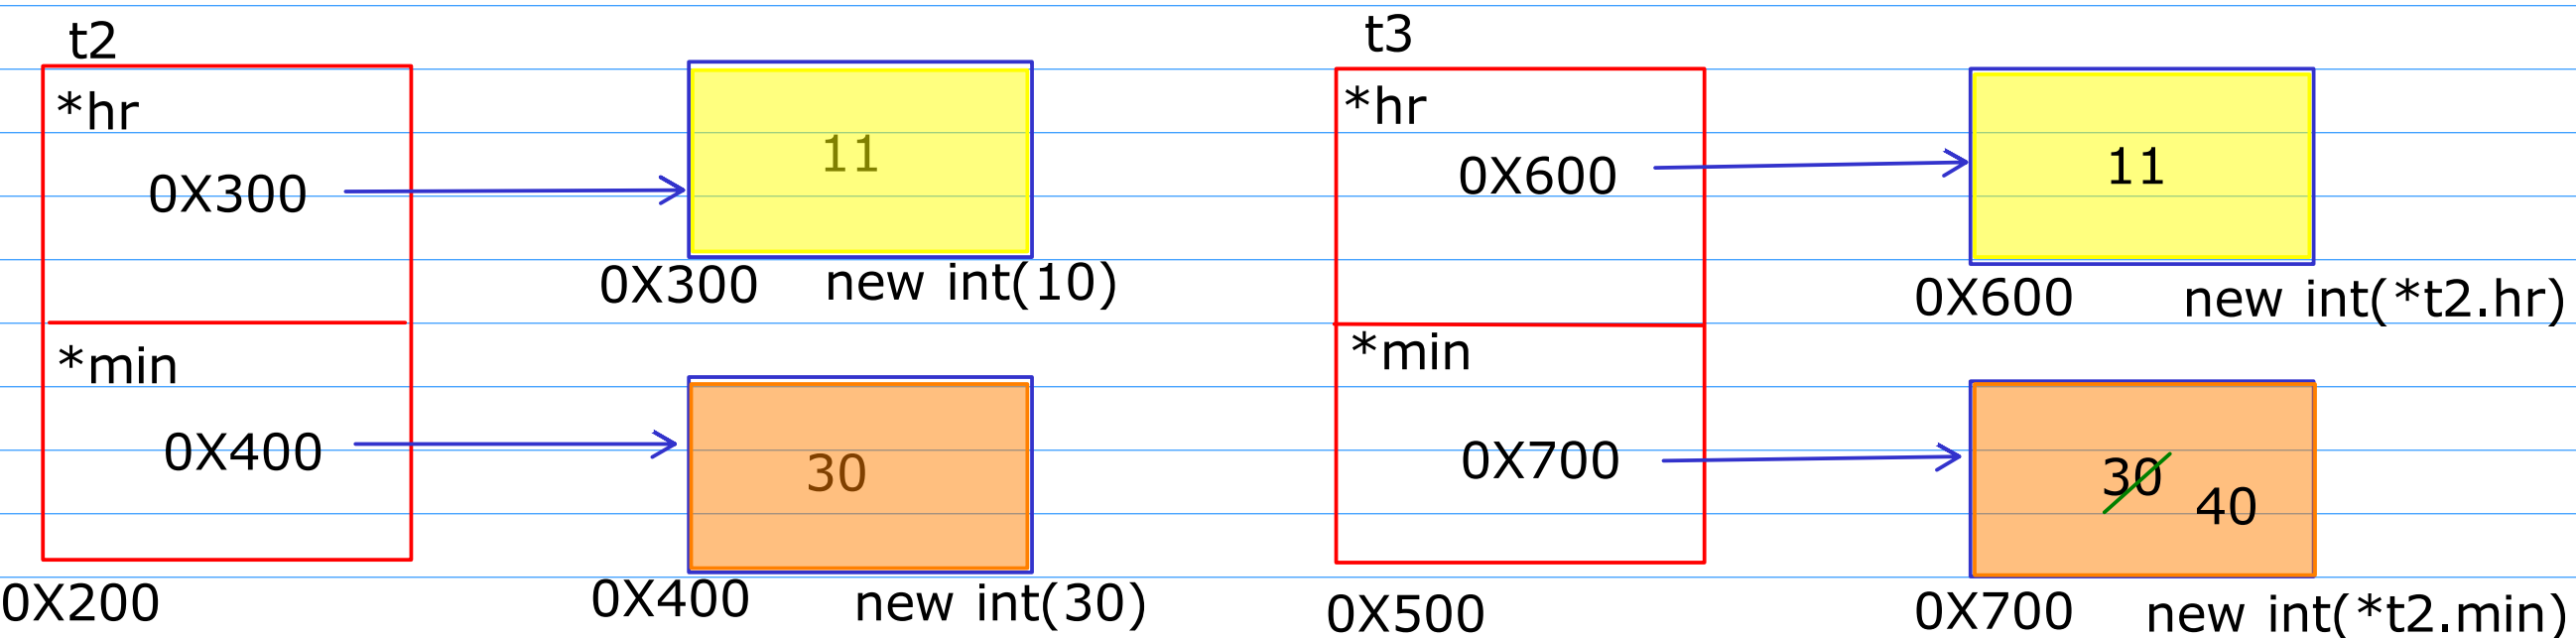

Time t3 = t2;

Time t3 = t2

Time t3 = t2

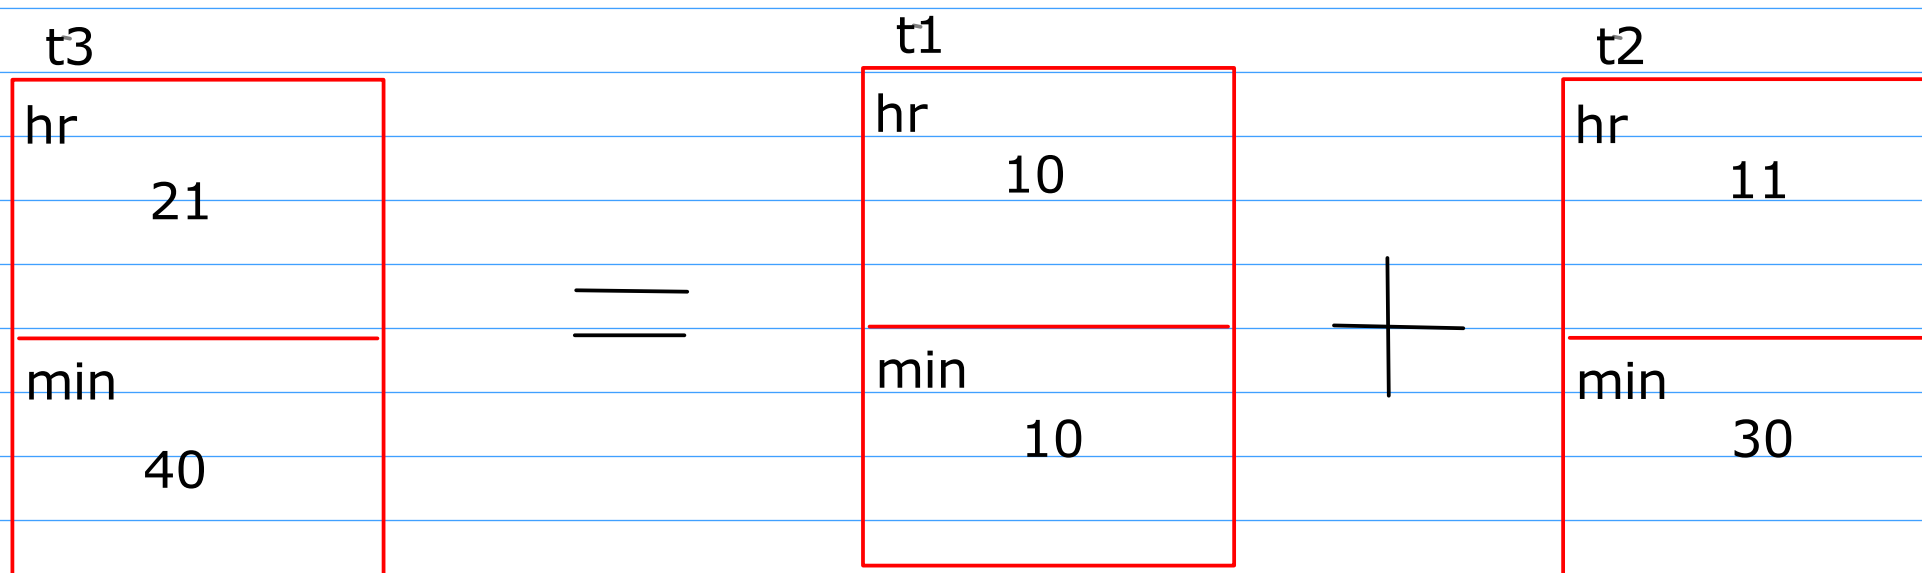

User Defined Copy Ctor
Deep Copy

10.25 + 20 = 30.25

"sunbeam"+"Infotech" = SunbeamInfotech

```
Time t1;  
Time t2;  
t1 + t2 = ;
```

```
Time t3 = t1 + t2;  
t3.hr = t1.hr + t2.hr;  
t3.min = t1.min + t2.min;
```

To display the state of an object in cout in human readable form overload the insertion operator (toString()->Java)

Arithmetic Operators(-,*,/)
Pre and Post Increment and Decrement Operators
