Web Architecture

home.html   HTML
orders.html
signin.html

```
<html>

        <head>
                <!-- metadata -->
        </head>

        <body>
                <!-- UI -->
        </body>
</html>
```

\# Inside Head we can use the below tags
1. title -> To add the title for our html page
2. meta -> to add the meta data of html page
3. link -> to link the external resources in the html page
4. style -> used to add the css to our html page
5. script -> used to add the JS code in html page
6. base -> it is used to add the base url for all the external resources

\#\# Attributes
- It is a key-value pair avaiable for every tag
- Every tag in html has the below attributes
1. name
2. id
3. class
4. style

`<table>` `<th></th>`	`<th>`	`</th>` `<th>`	`</th>`	
`<thead>`				header
`<tr>` pid	name	price	`</tr>`	
`</thead>`				body
`<tbody>`				
`<tr>` 1	Pen	10	`</tr>`	footer
`<td></td>`	`<td>` `</td>`	`<td>` `</td>`		
`<tr>` 2	Pencil	5	`</tr>`	
`</tbody>` `<td></td>`	`<td>` `</td>`	`<td>` `</td>`		
`<tfoot>`				
`<tr>` Total		15	`</tr>`	
`</tfoot>` `<td>`	`</td>` `<td>`	`</td>`		
`</table>`
